COMPOSITE DOORS
COLOUR RANGE

be comfortable
with your colour choice!

Standard Range - 10 Year Colour Fast Guarantee.

Our standard range of door colours use a twin-layered exterior grade film laminated onto our door skins to supply a plain or printed woodgrain finish.

This film incorporates a coloured pigment in the base layer which uses Solar Shield Technology to protect against excessive heat build-up. The transparent PMMA upper layer protects the colours and designs against fading caused by UV radiation or other weathering effects and allows us to supply our 10-year colour fast guarantee.

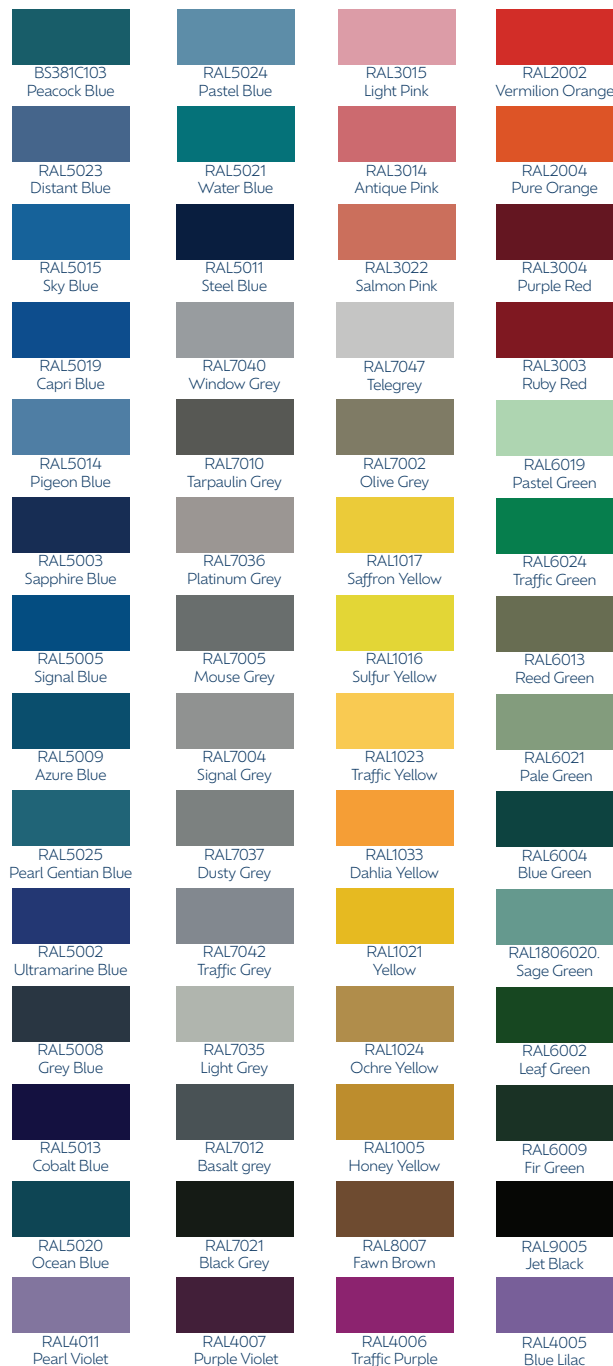

Not only does this finish ensure your door will keep its colour throughout its lifetime it will also be a perfect match to the film-coated door frame.

*matching frame not available.

“Special” RAL Colours

If you require a more bespoke appearance, we also offer an extended range of “Special” RAL coloured finishes created by our inhouse mixing station.

Special RAL Colours are only available on the door and not the door frame
